

A comprehensive UI/UX blueprint, visual style guide, wireframe layout map, and component specification document for the redesign of the **Acknobit AI** platform.

 1. Project Overview

- **Project Name:** Acknobit AI Website Redesign
- **Objective:** Transform the existing static site into an interactive, high-converting, dark-themed AI web application. Fix current visual bugs, reduce contact form drop-off rates with a 2-step wizard, and add an integrated Admin Dashboard.

2. Design System & Style Guide

A. Color Palette

| Palette Role     | Color Name          | Hex Code / Value          | Usage                                     |
|------------------|---------------------|---------------------------|-------------------------------------------|
| Background Base  | Slate Navy          | #0F172A                   | Main page background                      |
| Surface / Card   | Dark Steel          | #1E293B                   | Card containers & modals                  |
| Card Border      | Subtle Glass Edge   | rgba(255, 255, 255, 0.08) | Glassmorphism borders                     |
| Primary Accent   | Electric Royal Blue | #3B82F6                   | Primary buttons, active states, key icons |
| Secondary Accent | Emerald Growth      | #10B981                   | Gradient highlights & secondary badges    |
| Glow Accent      | Electric Purple     | #1E90FF                   | Background glow ambient lights            |
| Text Primary     | mint cream          | #F5FFF                    | Headings & primary labels                 |
| Text Secondary   | Cool Slate          | #9CA3AF                   | Body text, subheadings, captions          |
| Status Success   | Emerald Green       | #10B981                   | Success alerts & active indicators        |

B. Typography Scale

- **Font Family:** Inter, Plus Jakarta Sans, sans-serif
- **Display / Hero Heading (H1):** 3.5rem / 56px | Weight: 700 (Bold) | Line Height: 1.2
- **Section Heading (H2):** 2.25rem / 36px | Weight: 600 (Semi-Bold) | Line Height: 1.3
- **Card Heading (H3):** 1.5rem / 24px | Weight: 600 (Semi-Bold) | Line Height: 1.4
- **Body Text (Regular):** 1.0rem / 16px | Weight: 400 (Regular) | Line Height: 1.6

### C. Layout & Grid System

### C. Layout System (FlexBox Container)

- **Desktop Layout:** Responsive Flex Container (display: flex, flex-wrap: wrap) | Max-Container Width: 1280px | Flex Gap: 24px | Multi-column flex basis (flex: 1 1 calc(33.333% - 24px))
- **Tablet Layout:** Adaptive Flex Container (flex-wrap: wrap) | Screen Margin: 24px | Flex Gap: 16px | 2-Column flex basis (flex: 1 1 calc(50% - 16px))
- **Mobile Layout:** Vertical Flex Stack (flex-direction: column) | Screen Margin: 16px | Flex Gap: 12px | Full-width flex basis (flex: 1 1 100%)

## 3. Page Structure

### PUBLIC HOMEPAGE (index.html)

# 4. Admin Panel UI

## Admin Login Page

# 4. Admin DashBoard UI

## Admin DashBoard Page

# 5. Detailed Features Breakdown

## 1. Interactive Live Chat Simulation Widget (Hero Section)

- **Description:** A real-time interactive chatbot preview embedded directly within the hero section.
- **How It Works (UX):**
  - Visitors can select quick-action prompt buttons.
  - The widget displays an animated typing indicator (. . .) .
- **Business Benefit:** Gives prospective clients an instant hands-on demo of Acknobot's AI bot capabilities without requiring signup or contact information.

## 2. Interactive AI ROI & Time-Saved Calculator

- **Description:** A slider-based interactive tool allowing B2B clients to estimate operational time and cost savings using Acknobot's AI automations.
- **How It Works (UX):**

- **Slider 1 (Input):** Select Team Size (1 to 100+ Employees).
  - **Slider 2 (Input):** Select Manual Repetitive Hours spent daily (1 to 8 Hours).
  - **Dynamic Output Display:** Real-time JavaScript calculations compute:
    - *Estimated Hours Saved / Month*
    - *Cost Efficiency Increase (%)*
  - **Business Benefit:** Quantifies value immediately for decision-makers, significantly speeding up lead conversion.
- 

### 3. Dynamic Filterable Portfolio Showcase ("Our Works")

- **Description:** An interactive showcase gallery where prospective clients can explore real case studies, live bot demos, and industry-specific proof of work.
  - **How It Works (UX):**
    - **Multi-Category Filters:** Visitors can filter showcase items by **Company/Industry Type** (e.g., *E-commerce, Real Estate, Healthcare, Finance*) as well as **Bot Type** (e.g., *WhatsApp Bots, Voice Assistants, AI Agents*).
    - **Dynamic Filtering:** Selecting a filter updates the project cards instantly without page reloads using JavaScript (`fetch()` API).
    - **Impact & Benefit Metrics:** Each project card prominently displays measurable results and benefits achieved (e.g., *"Saved 120+ hours/month", "40% increase in qualified leads", "Automated 85% support queries"*).
    - **Interactive Demo Modal:** Clicking on any project opens a Lightbox Modal displaying live demo previews, workflow diagrams, and client testimonials.
  - **Business Benefit:** Eliminates client skepticism by showcasing tangible proof-of-work, allowing potential leads to see exact benefits achieved by businesses in their specific industry.
- 

### 4. Admin Lead Tracking & Status Management System

- **Description:** A dedicated dashboard view inside the internal Admin Portal (`admin-dashboard.html`) for managing client inquiries.
  - **How It Works (UX):**
    - Incoming client inquiries are populated in real-time into a clean, searchable data table.
    - Admins can update lead conversion stages via a dropdown selector (`NEW` → `IN_REVIEW` → `CONTACTED` → `CLOSED`).
    - Integrates with Spring Mail Sender for instant email alerts upon new form submissions.
- 

### 5. Admin Portfolio Manager (Zero-Code CRUD System)

- **Description:** A content management interface within the Admin Portal for publishing and editing showcase items.
- **How It Works (UX):**
  - Admins can upload new project entries (*Title, Category, Demo Link, Image URL, Featured Flag*).
  - Provides inline controls to edit details or delete outdated portfolio items from the live website.
- **Business Benefit:** Allows non-technical team members to keep the portfolio up to date without requiring developer intervention or code deployment.
